SCISSORS

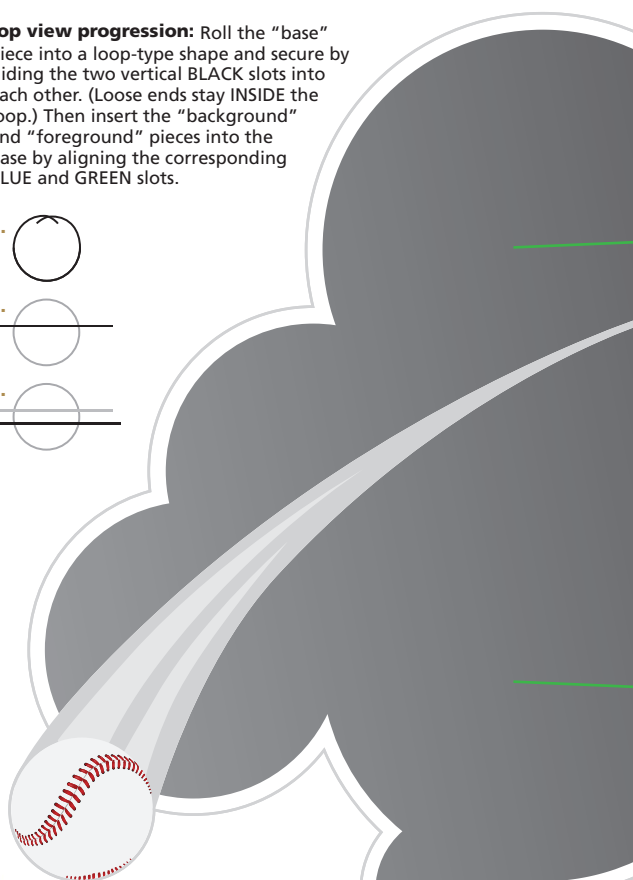

ASSEMBLE!

HERE'S HOW: Trim out the 3 pieces that form your papercraft right on the light gray outlines. Don't forget to cut the color-coded assembly slots in each piece

No tape? No glue?
No knives? No Kidding!

Top view progression: Roll the "base" piece into a loop-type shape and secure by sliding the two vertical BLACK slots into each other. (Loose ends stay INSIDE the loop.) Then insert the "background" and "foreground" pieces into the base by aligning the corresponding BLUE and GREEN slots.
